## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Cooper et al (US 2,428,908).

Cooper discloses a fishing reel comprising:

a reel body attachable to a fishing rod, the reel body having right 12 and left side plates, and a plate (see below) connected between the right and left plate to partially from an upper surface of the reel body;

a spool rotatably supported between right and left side plates;

a handle 25 disposed at a side portion of the reel body for rotating the spool to winding a fishing line on the spool, a rotation axis of the handle being substantially parallel to rotation axis of the spool; and

an auxiliary operating member 29 for auxiliary winding the fishing line on the spool provided at a position in which the auxiliary operating member can be operated by a finger of an angler's hand holding the fishing rod to which the reel body is attached, wherein the auxiliary operating member is formed so that, when the handle is rotated to rotate the spool, the auxiliary operating member is not rotated in response to the rotation of the handle,

Art Unit: 3654

wherein a one-way clutch (col. 3, lines 63-75) is interposed between a rotating member 15 where the rotating member is rotated in response to the rotation of the handle 30 and the auxiliary operating member 29,

wherein an operating portion of the auxiliary operating member to be operated by the finger is rotatably provided between the left and right side plates which constitute the reel body, and wherein the operating portion is formed in a lever shape 29, and

wherein the plate is respectively positioned between the auxiliary operating member and a front-end of the reel body, and wherein the operating portion is projected upward from a surface of the plate.

#### *Response to Arguments*

Applicant's arguments with respect to claims 1, 2, 11 and 12 have been considered but are moot in view of the new ground(s) of rejection.

*Conclusion*
